## **ARTICULATOR™ 5000** Precise and Safe Handling

## **ARTICULATOR<sup>™</sup> 5000**

With a maximum lift/SWL of 5 tonnes, the Articulator™ 5000 is capable of manipulating, manoeuvring and rotating sections, poles, masts and posts up to 20m length\*.

With its four uniquely adjustable feet and telescopic legs, the Articulator™ 5000 can adjust to various changes in width and size and remain sturdy and safe.

- Lifts regular or tapered structures of varying widths, clamping and holding securely - for safe and precise positioning
